

Children's Mercy

KANSAS CITY

Pharmacogenetics Repository

Researchers at CMH want to learn how to better match kids with medications. We are looking for doses that are safest and work best for them.

What happens if my child takes part in the study?

Your child will have saliva, blood, and/or urine collected either at home or during a clinic visit with Children's Mercy.

Is this study a good fit for my child?

This study is for anyone who has had genetic (DNA) testing done with Children's Mercy.
